## 1 LAVAGGIO RAPIDO

Dal 1996, data del deposito del primo brevetto specifico, i sistemi per tende a pacchetto Mottura adottano dispositivi che permettono di rimuovere la tenda con estrema facilità e re-installarla con altrettanta rapidità dopo averne effettuato il lavaggio. I rocchetti avvolgitori della gamma Rotary, dei sistemi compatti Softbox e dei sistemi Basic 441/419 sono progettati per rimuovere il telo unitamente ai suoi nastri/corde di sollevamento. Effettuato il lavaggio del telo, è sufficiente posizionarlo sul sistema per ripristinarne il funzionamento. Questa soluzione ha semplificato molto la manutenzione delle tende a pacchetto permettendo il loro utilizzo sia nel residenziale che nelle comunità.

## 2 FAST WASHING

*Since 1996, when the first specific patent was filed, Mottura Roman blind systems have adopted devices that allow the awning to be removed very easily and re-installed just as quickly after washing it. Spools the Rotary range, the compact Softbox systems and the Basic 441/419 systems are designed to remove the fabric together with its lifting belts / ropes. Once the fabric has been washed, simply place it on the system to restore operation. This solution has greatly simplified the maintenance of the Roman blinds allowing them to be used both in residential and community areas.*

## 3 TENDE DI GRANDI DIMENSIONI

Rotary e Softbox, nella configurazione per grandi tende, sono dotati di meccanismi demoltiplicati che riducono lo sforzo dell'azionamento e permettono di azionare tende per grandi superfici.

## LARGE ROMAN SHADES

*The Rotary and Softbox systems for large blinds both have a gear down drive. This reduces the effort required to operate a heavy blind.*

## 4 DESIGN & FUNZIONALITÀ

Mottura offre 17 diversi sistemi per tende a pacchetto; dai sistemi per installazione diretta su anta alle soluzioni motorizzate per grandi vetrate. Il concetto è Design & Funzionalità; il design quale priorità per i sistemi compatti, la funzionalità e la praticità per tutta la gamma.

## DESIGN & FUNCTIONALITY

*Mottura offers 17 different roman shade systems; solutions for direct installation on to the frame, to motorized systems for large windows. The concept for roman blind systems is Design & Functionality; the design is a priority for the compact systems, the functionality and practicality for the entire range.*

## 5 M2NET

È la soluzione sviluppata da Mottura per la gestione dell'home automation. La gamma dei sistemi per tende a pacchetto azionate a motore digitale a basso consumo è M2net compatibile.

## M2NET

*It is the solution developed by Mottura for Home Automation Control. The motorized roman shades range for blinds operated by low-power digital motor is M2net compatible.*

## Applicazioni speciali / Special applications

I sistemi per tende a pacchetto Mottura sono sistemi all'avanguardia nel mondo per la loro versatilità.

La gamma offre soluzioni per tende con curve concave o convesse ad ampio raggio, tende con curve ad angolo di 90° ed anche tende ad arco.

*Mottura roman shade systems are at the forefront of the world for their versatility. The range offers solutions for curtains with concave or convex bends, large radius curves, concave blinds with 90° bends, and it is also possible to have roman blinds in an arch shaped window.*

## Tende inclinate / Sloped blinds

Tra le soluzioni speciali i sistemi per tende a pacchetto Mottura permettono la realizzazione di tende inclinate, sia ad azionamento manuale che a motore per tende di medio/grandi dimensioni. Basic e Rotary sono sistemi che possono essere installati inclinati anche nella versione a lavaggio rapido, permettendo così lavaggio della tenda semplice e rapido.

*Among the special solutions, Mottura Roman blind systems allow the creation of sloped blinds, both manually operated and motorized for medium / large-sized blinds. Basic and Rotary are systems that can also be installed sloped in the quick wash version, thus allowing simple and quick washing of the awning.*
